

CALIFORNIA WATER PLAN UPDATE 2018 & CWEMF SPECIAL WORKSHOP

Performance Assessment & Sustainability Indicators

June 28, 2017

9:30 a.m. to 3:30 p.m.

3301 C Street, Sacramento, CA

Please RSVP at: <https://www.surveymonkey.com/r/June28RSVP>

CWEMF Members are cordially invited to this Special Workshop. During this interactive session CWEMF members will receive an overview of the California Water Plan Update 2018 planning framework and be asked to provide input on a proposed performance assessment approach and associated Sustainability Indicators. The goal is to identify common indicators/metrics that measure how water management actions help support four overarching societal values: public health and safety, a healthy economy, ecosystem vitality, and opportunities for enriching experiences. This includes affirming appropriate existing and potential new data sources to support the Sustainability Indicators.

Sustainability Indicators are being developed for the following:

- | | | | |
|--|--|--|--|
| | <i>Adequate Water Supply</i> | | <i>Water Supply of Suitable Quality</i> |
| | <i>Exposure to Health Threats</i> | | <i>Consideration of Economic Risk</i> |
| | <i>Risks to People from Extreme Events</i> | | <i>Economic Efficiency</i> |
| | <i>High Quality Natural Resources</i> | | <i>Social Disruption Following Disasters</i> |
| | <i>Biodiversity</i> | | <i>Cultural/Historical Sites and Communities</i> |
| | <i>Natural Areas of Value</i> | | <i>Access to Educational Resources</i> |
| | <i>Recreational Opportunities</i> | | |

To receive a copy of the full agenda and parking information RSVP here:

<https://www.surveymonkey.com/r/June28RSVP>

Session materials include a workbook. Your RSVP will ensure a sufficient number of handouts are available.

About CWEMF and the California Water Plan

CWEMF serves as a **technical advisory body** for **California Water Plan** (Water Plan). The Water Plan is the State government's strategic plan for managing and developing water resources statewide for current and future generations. It provides a collaborative planning framework for elected officials, agencies, tribes, water and resource managers, businesses, academia, stakeholders, and the public to develop findings and recommendations and make informed decisions for California's water future. Information from the Water Plan is used to guide the State's investment and grant programs and provides policy guidance for law makers. To learn more about the Water Plan, visit http://www.water.ca.gov/waterplan/about_us/index.cfm
